

Dear Families,

As you know, research abounds in affirming that the greatest gains for each child are achieved when structured and supportive programming is both continuous and ongoing.

Summer help is available for your child to continue the gains they have made during the school year through their IEPs, ISP's at their local district, MTC or alternate private agencies. MTC's licensed and credentialed therapists can provide individual, group or family support services in home or our local office(s) as needed.

Our therapists specialize in supporting children's skill building in the following areas:

- social/emotional skills
- coping with anxiety
- executive functioning
- managing depression
- literacy skills
- speech/articulation
- following directions
- answering questions

We welcome the opportunity to collaborate with you on continuing goals/objectives for your child.

If you have any questions regarding our private multidisciplinary services please don't hesitate to contact our office 847-816-7200.
